Experience

Juniper Networks India
Intern - Software Engineer 3
(2019 - 2023)

Developed pre-LLM era AI tools and dashboards that helped internal engineers (~ 150). Developed a "network engineering" based mini language model. Minimised tasks that took manual tasks of several weeks to hours.

Mental Health & Career Break
(2 Years)

Having played video games for more than a decade, non-linear thinking, game theory, space (map) sence, resource control, communication, coordination, teamwork, and a keen sense of human behaviour come naturally to him.

Technical Skills

Design Softwares:
Adobe Photoshop, Adobe Illustrator, Affinity Designer

Pages / Layouts:
Adobe InDesign, Affinity Publisher

Wireframing:
Figma / Lunacy

Code:
Python, C++, Java, HTML/CSS/JS, Svelte + Nodejs, data science stuff, can tango with AI

He codes, and designs too!

The debutant loves pixel art, isometric environment design, and designing characters. Believing everything can be learnt, and mastered, he is a lifelong student.

"The glass if half full if you're filling it. Half empty, if you're drinking from it. Nothing is isolated in time. And time is perspective."

(Left) "Agni", circa 2025
